

DISHWASHER TABS

- 2 cups washing soda
- 1 cup baking soda
- 1/2 cup citric acid
- 1/2 cup kosher salt
- 1/2 cup distilled water
- 1 teaspoon castile soap
- 20 drops lemon essential oil
- 10 drops orange essential oil
- 15 drops Purification essential oil
- 2 ice cube trays (flexible ones work best to pop them out)

DIRECTIONS

- In a large bowl, mix together all the DRY ingredients. **DO NOT PUT THE WATER IN YET!!**
- Add in the castile soap and the lemon, orange and Purification essential oils. Mix well.
- Next, **SLOWLY** add in the water a little bit at a time and mix well. It will start to clump...this is what's supposed to happen, but you want to act fast. You may not need to use the whole 1/2 cup of water, so go slowly and work a little at a time. If it looks too dry, add in a little more water a splash at a time.
- Once it is mixed well, pack well into two ice cube trays (take your time doing this and make sure they are well compacted – they should feel “wet” but not solid yet.)
- Set ice cube trays out to dry for at least 24 hours in a sunny spot (a window sill is good).
- After 24 hours, remove the tabs and store in an air-tight container. If you are using the flexible trays they will come out easier. Save **ALL** of the crumbs and crumbles so that you can use all of those at the end for a cycle.
- When it's time to wash your dishes, put your dishwasher tab in the detergent container and start your cycle.

LEMI SHINE

Bin the bottom of the food processor add:

- 2 cups citric acid
- 2 teaspoons lemon essential oil

Add the lid and process for about two minutes.

Let the powder settle before you open it, unless you want a painful whiff!

Put the Lemi shine in detergent compartment and regular detergent in the prewash compartment.

Make sure to use both of these together to have clean and spot free dishes.
